

## Burning a CD/DVD in OS X

1. Insert a blank CD or DVD into the disk drive.
2. When the CD or DVD mounts on the desktop you will have an option to name it. Enter a name and press **OK**.

The Finder window should open and display the CD or DVD volume in the Sidebar. (If the Finder window does not open, choose **Go | Computer** from the **Finder** menu.)

3. Drag **everything** you wish to copy to the CD or DVD icon in the Sidebar.
4. When you are finished, click the small yellow and black CD or DVD icon to burn it.

5. When the CD or DVD is complete the yellow and black CD or DVD icon changes to an **Eject** button to aid you in removing the completed CD or DVD from your laptop.
