

## Correcting a Projector Display Issue

If your projector is not displaying what is on your laptop or computer, do the following:

1. With your computer or laptop hooked up to a projector, click on the **Apple** at the top left of your screen and choose **System Preferences**.

2. In the window that appears, choose **Displays**.

3. Two windows will pop up. Pull up the window that says **VGA Display**.
4. Click on the **Arrangement** tab. Make sure that "**Mirror Displays**" is checked.
