

## Change Your Security Settings

1. Click on the  in the top left of your screen.
2. Click on **System Preferences**.
3. In the window that opens, click on **Security and Privacy**.
4. If the lock is locked at the bottom left of the window that opens, click it and type in your laptop password. (If it is unlocked, skip this step.)
5. Under **Allow apps downloaded from**, click on **Anywhere**.

6. Click on **Allow From Anywhere**.

7. Click on the lock again to lock it.
8. Go to **System Preferences** at the top and click on **Quit System Preferences**.
